HOW ARREOS INTERNATIONAL WORKS

*How does exquisite leather make you feel? In one word – **RICH***

*And that is exactly what we at **ARREOS INT.** aim to give you – A **RICH** indulgent experience of the finest leather in town.*

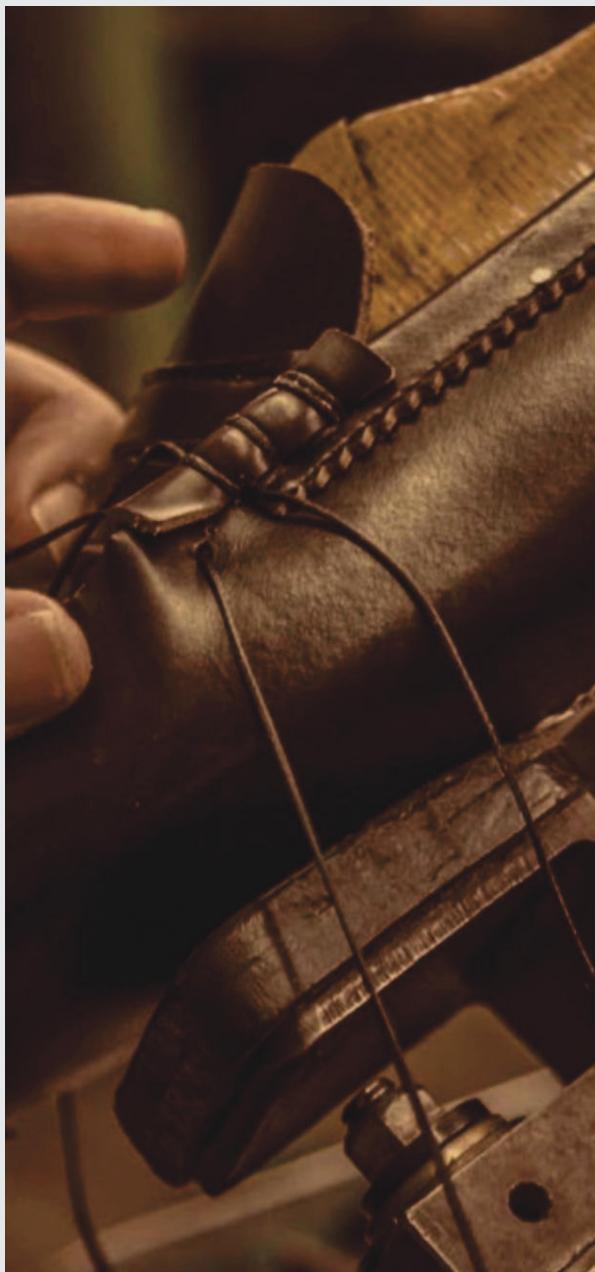

When leather so premium and the expertise of our craftsmen meet, what you get is a finely crafted product that redefines panache.

With a team of suave designers, trendy researchers and experienced craftsmen we make sure you are nothing short of a style icon. Step in to know how. Shortcodes Page Message in a Bottle .

Our Specialties

1. GOODYEAR WELTED

Goodyear welting is the oldest, most labor intensive, and most durable of the three methods of construction. It can be done by machine or by hand and involves multiple steps.

Goodyear welting is the oldest, most labor intensive, and most durable of the three methods of construction. It can be done by machine or by hand and involves multiple steps.

Handmade/handpainted Shoes

2 . HANDMADE / HANDPAINTED

Indian leather shoes Handmade and Hand Painted: unique, beautiful, comfortable. The industrial process, all the leather shoes of the world are made with leathers already colored in tannery.

Leathers usually go inside an automatic spraying paint machine, a big tunnel where they get painted by airbrush and then dried inside an oven. Shoemakers normally buy colored leather from tanneries and then they work it (cutting, closing, making of the shoes).

We started a completely different concept. We producing on Crust Leather, then we cut it, hand paint it (yes, one by one!) and assemble it. In our method the colour follows the shape of the shoe and the line (not the opposite), creating a design which is unique and impossible to realize in any other industrial way. It's a process that requires more time and more craftsmanship: the final result is stunning, and unique. Then, selling directly to our customers.
